

# Worldwide Engineering

Excelerate is an international defense market solutions provider with deep roots in technology and its application to defense systems. Our team of engineering personnel along with strong support from our defense system community provides the basis for engaging the technical opportunities presented in the global market.

Our international customer base spans the globe with engineering solutions that incorporate the latest in technology to include sensors, systems, simulations, and technical training. Coupling our depth in technology and engineering with the capability to satisfy the ITAR requirements and experience in international business provides Excelerate the leverage required to be successful around the globe.

**International Systems:** Excelerate responds to international defense system opportunities as systems engineer, integrator, and developer for customers wanting a U.S. based solution. We establish the necessary technical team to satisfy the requirements in providing a timely and cost effective solution to the international customer. Contact us if you want to get involved.

**Subject Matter Facilitator:** Excelerate provides a conduit for international customers and US experts to work together safely in the boundaries allowed by the ITAR. You as the instructor provide the teaching materials and onsite instruction and Excelerate provides the business and exporting framework for a successful defense tutorial event.

**U.S. Products:** Excelerate applies our technical capability and international defense business knowledge to support U.S. contractors and their defense products into the global marketplace. Our team of professionals can evaluate your product and position it for ITAR export approval and identify global opportunities that fit the technology and need.

**International Customers:** Excelerate identifies opportunities for an international customer's products in the U.S. market. Often these are components and systems that solve a unique problem or provide a new capability.
